-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, and 32-34, drawn to a compound of formula 1A, and compositions thereof, classified in class 435, subclass 91.31.
 - II. Claims 1-24, and 32-34, drawn to a compound of formula 1B, and compositions thereof, classified in class 435, subclass 91.31.
 - III. Claims 25-31, drawn to a method of cleaving a target mRNA in a subject or host cell comprising administering the compound of formula 1A to said subject or host cell, classified in class 514, subclass 44.
 - IV. Claims 25-31, drawn to a method of cleaving a target mRNA in a subject or host cell comprising administering the compound of formula 1B to said subject or host cell, classified in class 514, subclass 44.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the nucleic acid molecules of groups I-II are directed to products, and groups III-IV correspond to methods of using the nucleic acid molecules of groups I-II. However, the invention of groups I-II, may also be used in methods other than those

Art Unit: 1635

described in the invention of groups III-IV. For example, the claimed nucleic acid molecules may be used as an endonuclease in a cell free system to cleave a target mRNA molecule.

3. The inventions of groups I-II are distinct since they are directed to patentably distinct nucleic acid molecules possessing different nucleotide sequence compositions.

4. The inventions of groups III-IV are directed to the patentably distinct methods comprising the use of distinct nucleic acid molecules.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Additionally, the search for Group III is not required for the search of Group IV.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
